LIGHT DUTY SKI & SNOWBOARD REPAIR PISTOL

The **SKI-MENDER RP100** is the ideal light duty repair pistol for a quick repair to the base of your ski/snowboard when used with our $\frac{1}{2}$ " (12mm) diameter repair rods.

The **SKI-MENDER RP100** has been designed with a special flat head nozzle to make it easy to dispense the repair material and enable the operator to iron it into the damaged part on the base of the ski/snowboard

The **SKI-MENDER RP 100** is very simple to operate. After loading the pistol with the repair rod and allowing an initial warm up time between 15-20 minutes, the molten repair material is extruded through the heated flat head nozzle by simply squeezing the trigger. The flow rate of the repair material is regulated by trigger pressure.

SKI-MENDER RP 100 is supplied with a separate metal stand and four sample repair rods.

FEATURES

Special flat head cast-in nozzle

Full length easy to use trigger & slim profile handle

Stable metal stand for safe storage of the repair pistol

Open breech area to allow easy cleaning plus power-on warning light
